Put NetRoofer to work for YOU!

ASK YOURSELF:

Does your current application for managing your customers reflect your company culture and instill pride and enthusiasm in your employees? Do you even **have** an application for managing customers?

Are relevant job details languishing in manila folders, on scraps of paper, or inside individual employee's heads? Do customers have to tell and re-tell their stories when trying to get information about job status?

- **Double or even triple your referral business**
- **Reduce stress and turnover in sales and administrative personnel**
- **Know the details of any job, any time with one integrated database**

NetRoofer installed my ACT! Customer Management System and I'm now generating twice as much referral business.

ACT! is so easy to use and it integrates with all of the Microsoft Office applications.

- Ron Schumacher, Owner
Budget Exteriors

Stress from poor accessibility and lack of information doesn't have to be the rule.

ACT! will organize and simplify your business

Know WHO, WHAT, WHEN and HOW about every client, salesperson vendor and crew in an instant!

We know where all of our customers are in the sell, build and collect cycle thanks to NetRoofer! I instantly know things I used to could only wonder about!

The whole thing is fantastic – we are not embarrassed anymore when salespeople, customers or the owner calls for an update! My production runs so smooth I can take naps during the day

Record the details of every conversation so that no matter who your customers speak to, you know at a glance what was said, when, and by whom.

Imagine every detail of every job, from lead, sale & claim info to materials and crew, even pictures and documents, available from any workstation, any time... It really is that easy!
